# 1. Installation

## 1.1 FTP Uploading

Once you've produced your website, found a Host and registered a Domain Name, you need to transfer your site files on to your webspace (host's server) so people can at view your latest and greatest.

This procedure is called 'uploading' your website, and involves the transfer of files via FTP. The File Transfer Protocol allows computers to exchange files, upload or download, via the Internet.

Using your FTP program, upload the non-zipped theme folder into the root folder on your website server.

# 2. Filterable Portfolio

## 2.1 Portfolio Images

To change the portfolio images in your filterable gallery, all you need to do is to load in your photos into the "...images/portfolio" folder. Name them in sequence as "work1.jpg" all the way up to twelve images (as currently designed).

## 2.2 Portfolio Categories

To change the categories, where it has the quotes after "data-tags", change these to your own. For example, the filter "Web Design"...change this to your own category and for multiple filters, list them separately with a comma in-between. This is found in the index.html file, lines: \_\_\_\_\_. This is just the one category, to change the rest, look right below in the code.

## 2.3 Rollover Text

To change the header/mini-description in each portfolio peice, just go into the index.html file and between lines 80 -130, edit the text inside the <span></span> tags.

## 3. Logo & Colors

### 3.1 Logo

Just upload your logo image into the \_\_\_\_\_ file location and adjust the size/dimensions as needed via the css.

### 3.2 Tagline

To modify/add in your custom tagline, located under your logo. Locate the text within the index.html file in line 43. Just modify it to your liking.

### 3.3 Colors

To edit the colors in the theme, open the styles.css file and adjust the colors accordingly.

### 3.4 Alternate Backgrounds

Changing the background is rather simple. All you need to do is ensure that you upload the background image that you like in the "...images" folder and rename it "bg.jpg". Don't forget to rename it!

## 4. Links

### 4.1 Setting your quick links

To edit the quick links, just go into the index.html file and locate the code on lines: 35-40 and change them in there.

### 4.1 Footer Links

In the footer of the theme, you will notice a facebook/twitter link section to the right, and a copyright/extra link section to the left. To change these, just go to index.html, at line 138.

## 5. Overlay Content

### 5.1 Editing

Locate, in the index.html file, lines 49-52 to change the text for the about section in the drop down overlay.

### 5.2 Person Image

Drop the image of your self, resized to 86 x 86 px, and named "avatar.jpg in the "atlas/image folder location, and you're all set.

## 6. Contact Form

### 6.1 Recipient Address

To change the email address the contact form sends emails to, please first open the send\_mail.php file. Then find the code where it states "\$webmaster\_email= "EMAIL@emailaddress.com"...just change the email address to your own. (Line 6)

## 10. Sources & Credit
